

Instructions for Snowflake No. 2000-14 — Six pointed pattern (3 folds)

1. Cut out the hexagon shape below (outer line).
2. Fold the hexagon in half along the dashed line labelled FOLD 1. Keep the grey and white triangle (1/6th of snowflake) visible after each step.
3. Next fold along the dashed line labelled FOLD 2 that extends to the center of the snowflake.
4. Fold along the dashed line labelled FOLD 3, so you are left with a triangle shape with the grey and white snowflake image filling one side.
5. With a small pair of sharp scissors cut away all the grey areas so that only the white areas between the grey patches remain then carefully unfold to reveal your completed snowflake.

Notes: Attach a loop of black thread through one of the points to hang it on the Christmas tree. Flatten the snowflake by ironing it at low temperature between two sheets of paper. Photocopy the pattern (enlarge or reduce) if you wish to change the snowflake's size.
